

AGGREGATED CRITERIA: BIODIVERSITY

0.429		0.232		0.338	
1) Which areas have high biodiversity value ?		2) Which biodiverse areas are at risk ?		3) Which areas provide biodiversity opportunities ?	
0.059	Floodplain biotope value	0.054	Road segment length	0.169	Ecological corridors
0.169	Diversity of ecologically valuable habitats	0.085	Proportion of built-up area	0.169	Potential for natural floodplain restoration
0.201	Proportion of ecologically valuable habitat area	0.093	Levels of protection of natural areas
